

G.O.B. SRL CON SOCIO UNICO

Electrical wiring harnesses for industrial applications

Experience, precision and reliability
for different production sectors

gob-cablaggi.it

G.O.B. manufactures electrical wiring harnesses for industrial applications, with a strong focus on manufacturing precision, material quality and each customer's specific requirements. The company works as a **technical partner in the production of reliable, tailor-made solutions** for machinery, vehicles and systems where continuous operation and maximum safety are essential.

Every wiring harness is the result of manufacturing experience, technical expertise and attention to detail: an approach that enables G.O.B. to manage a wide range of projects while consistently maintaining high quality standards.

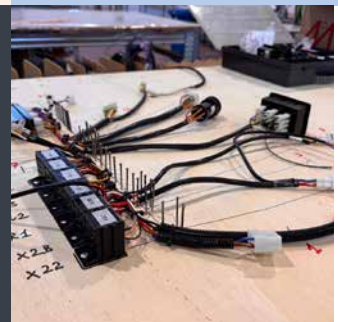

Over 40 years of experience

Production of electrical wiring harnesses for industry

Customised solutions

Highly specialised team

Headquarters in Mirandola, Modena

ISO 9001:2015 certification

A history built on expertise

G.O.B. was founded in Mirandola in 1981 by Oreste Bertoni and Graziella Patuzzi, with the aim of creating a **company specialising in the production of electrical wiring harnesses**.

Over the years, the company has expanded its areas of activity, adding new processes for special vehicles and increasingly complex industrial applications alongside traditional wiring harnesses.

An important milestone came in 2003, when operational growth led to the move to a new 500-square-metre facility equipped with state-of-the-art machinery.

Today, under the leadership of Simone Bertoni, the company continues to invest in research and development in order to offer advanced technological solutions and respond effectively to market demands.

1981

- Foundation in Mirandola, Modena

Following years

- Steady expansion of the sectors served

2003

- Expansion of the production facility

2024

- Opening of the new production facility

The value of a reliable partner

For over four decades, G.O.B. has stood for **excellence in the production of electrical wiring harnesses** for different industrial sectors.

Its strength lies in its ability to combine technical expertise, rigorous quality control and design flexibility.

EXPERIENCE AND EXPERTISE

Forty years of activity have consolidated deep know-how, enabling the company to meet even the most complex and specific requirements.

QUALITY WITHOUT COMPROMISE

Every production stage, from material selection to final testing, is focused on ensuring safe, durable and defect-free wiring harnesses.

PROBLEM SOLVING

G.O.B. works closely with customers to develop customised wiring harnesses, optimising design and performance according to the specific needs of each sector.

SELECTED MATERIALS

The use of high-quality components helps guarantee performance, durability and reliability over time.

Cross-sector expertise, tailor-made solutions

Automotive

Wiring harnesses for cars, motorcycles, buses and heavy vehicles, as well as special vehicles such as ambulances and hearses.

Platforms and agricultural sector

Solutions for cranes, truck-mounted cranes and lifting equipment, designed to ensure strength and operational continuity even in demanding working conditions.

Special machines and systems

Wiring harnesses for earthmoving, demolition, industrial ironing systems, games and amusement rides, vending machines, as well as third-party cable processing.

Industrial wiring harnesses and medium-sized electrical panels

G.O.B. has also specialised in industrial wiring, establishing itself as a reliable partner for companies requiring **customised, high-quality solutions**.

The company's expertise extends to the complete assembly of electrical components for the construction of medium-sized electrical panels, intended for machines and systems used in industrial environments.

Each order is managed with care, from from electrical diagram analysis through to final assembly, with the aim of ensuring **functionality, safety and compliance**.

Collaboration between the technical department, production and quality control makes it possible to respond accurately even to urgent or highly customised requests.

OPERATING APPROACH

- Electrical diagram analysis
- Assembly and wiring
- Quality control
- Customisation based on project specifications
- Support for complex industrial projects

Certified quality, direct support

ISO 9001:2015

ISO 9001:2015 certification confirms G.O.B.'s commitment to quality, process optimisation and **continuous improvement of customer satisfaction**. Every stage of production is subject to rigorous controls to ensure high standards and consistent reliability.

Alongside technical quality, G.O.B. offers a direct and practical relationship, based on listening, expertise and the ability to adapt to customers' production requirements.

It is this balance between manufacturing experience and focus on service that makes the company a **solid partner in the electrical wiring harness sector**.
